

Aigerim Sadykova

Senior Python Backend Engineer

8+ years building APIs, distributed systems, async workers, ETL, and platform tooling.

Stack: Python, FastAPI, Django, PostgreSQL, Redis, RabbitMQ, Docker, Kubernetes, AWS.

Recent role: led backend architecture for a SaaS product serving SMB finance teams.

Worked on event-driven services, billing, background jobs, search indexing, and observability.

Prefers remote product companies, backend/platform roles, strong engineering culture.

Open to senior backend engineer, platform engineer, software engineer roles.

Compensation target: 4500+ USD net monthly.

Exclude: internships, Android, iOS, pure frontend, gambling, crypto-only companies.

Based in Bishkek, available remote across EMEA or global async teams.
