

Nikita Ivanov

Platform / Backend Engineer

Based in Almaty, open to remote roles in CIS and international companies.

7 years in backend and infrastructure engineering for B2B SaaS and fintech.

Stack: Python, Go, PostgreSQL, ClickHouse, Kafka, Docker, Kubernetes, Terraform.

Built internal developer platforms, deployment tooling, CI/CD pipelines, and data services.

Interested in backend engineer, platform engineer, infrastructure software engineer roles.

Prefers remote or hybrid in Almaty/Bishkek; Russian and English speaking teams are okay.

Compensation target: 3500+ USD monthly.

Exclude: junior roles, manual QA, sales, support, and relocation-only jobs.
